#### Project Planning & Scheduling

##### 5.1 - Project Milestones & Tasks

###### 1 Data Collection

**Objective:** Gather high-quality, relevant data required for the project.

**Tasks:**

- Identify reliable data sources (databases, APIs, web scraping, surveys, etc.)
- Collect structured and unstructured data
- Ensure data relevance and completeness
- Store data in a centralized database or storage system
- Maintain data documentation for reference

**Deliverables:**

- Raw dataset
- Data source documentation
- Data storage setup

###### 2 Data Pre-Processing

**Objective:** Clean and prepare the data for model training and analysis.

**Tasks:**

- Remove duplicates and handle missing values
- Handle outliers and inconsistent data
- Data normalization or scaling
- Feature engineering and selection
- Encode categorical variables
- Split dataset into training and testing sets
